PROFESSIONAL SUMMARY

Results-driven **Frontend Engineer & React Developer with 3.5+ years** of experience delivering **8+ production-grade applications** across **fintech, edtech, NGO, and real estate** domains. Expert in **React.js, Redux Toolkit, RTK Query, TypeScript**. Track record of **cutting load times, eliminating code duplication, and accelerating feature delivery** through reusable component architecture, RBAC-secured UIs, and seamless API integration.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3
Frameworks & Libraries: React.js 19, React Native, Redux Toolkit, RTK Query, React Router, Custom Hooks
Styling: Tailwind CSS, Material UI, shadcn/ui, Responsive Design, Mobile-first CSS
Architecture: Component-based Architecture, RBAC, JWT Auth (frontend), REST API Integration, CORS
Performance: Code Splitting, Lazy Loading, Memoization, Virtualization, Asset Optimization
Tools: Git, GitHub, GitLab, Postman, Swagger, VS Code, Windsurf AI, Figma
Methods: Agile / Scrum, Reusable Component Design, Cross-browser / Cross-device Testing

WORK EXPERIENCE

Associate Software Engineer — *Oct 2023 – Present*

Techstalwarts Software Development LLP · Mumbai (Remote)

- Engineered and shipped **6 production React.js applications** across fintech, event management & NGO domains — serving **5,000+ users** across 10+ roles with zero critical UI outages.
- Reduced **page load time by ~40%** via code-splitting, lazy loading & asset optimization — significantly improved **Time-to-Interactive** across all projects.
- Built a **reusable component library (30+ components)** and custom React hooks adopted team-wide — cut **feature delivery time by ~30%** and eliminated code duplication.
- Implemented **Redux Toolkit + RTK Query** for centralized state management & API caching — reduced frontend API bugs by **~50%** in production.
- Delivered **pixel-perfect responsive UIs** (Tailwind CSS, MUI, shadcn/ui) aligned to Figma designs across all screen sizes.

Frontend Developer — *Nov 2022 – Oct 2023*

ViralBulls · Noida

- Developed **2 production React.js SPAs** (edtech + fintech) with Redux Toolkit & React Router — delivered on schedule with full feature coverage.
- Refactored component tree to **eliminate prop drilling** — improved render performance by **~25%** and boosted reusability across the codebase.
- Built **shared UI component library** used across 2 products — enforced design consistency and accelerated feature shipping.

Earlier Roles:
Production Supervisor · Romsons Group (Sep 2021–Nov 2022) | Engineer GET · Shivani Locks (Jun 2020–Sep 2021) | Trainee Engineer · R.B Engineering (Jul 2018–Feb 2020)

KEY PROJECTS

GetKredit — One-Stop Financing Platform (Real Estate & Business Loans) — *Apr 2024 – Present*

Stack: *React.js · Redux Toolkit · RTK Query · TypeScript · REST APIs · Material UI*

- Built **role-based dashboards for 10+ user types** (Admin, Agent, Customer, Manager) with **JWT-secured routes & RBAC** — platform onboarded 500+ agents within 3 months of launch.
- Architected **reusable React component system** scaling across all 10+ roles — reduced UI codebase by **~35%** vs. per-role implementations.
- Integrated **RTK Query for API state management**, eliminating redundant network calls and cutting frontend data-fetch errors by ~45%.

Invulb — Retirement Planning Platform — *Feb 2025 – Aug 2025*

Stack: *React.js · Redux Toolkit · REST APIs · Data Visualization · Recharts · Tailwind CSS*

- Built **interactive portfolio dashboards** with real-time retirement & investment insights — reduced client reporting time by **~60%**.

- Optimized React rendering for **10,000+ data-point datasets** — achieved smooth **60fps UI** via virtualization and memoization with zero performance degradation.
- Translated complex financial requirements into **clean, stakeholder-approved UIs** with fully responsive layouts across all breakpoints.

NuQuant — Investment Management App *Nov 2025*

Stack: *React.js · Redux Toolkit · RTK Query · TypeScript · REST APIs*

- Implemented **3-tier frontend authentication** (Client, Admin, Super Admin) with **granular RBAC across 20+ protected routes**.
- Built full **Portfolio CRUD module** with RTK Query-driven state — cut redundant API calls by **~45%** via intelligent caching.
- Resolved production performance bottleneck via **memoization + lazy-loaded routes** — reduced initial load time by **35%**.

Radius — Event Management Platform *Aug 2025 – Oct 2025*

Stack: *React.js · Redux Toolkit · REST APIs · Data Visualization · Material UI*

- Built **4 of 10+ core admin modules** (Dashboard, Users, Clients, Reports) — covered ~40% of platform UI single-handedly.
- Developed **real-time analytics & attendance dashboards** rendering live data for **1,000+ event attendees** per event.
- Ensured **fully responsive UI** across mobile and desktop with consistent cross-browser compatibility.

MagicBus — NGO Analytics Dashboard *Nov 2024 – Feb 2025*

Stack: *React.js · REST APIs · Recharts · Data Visualization · Tailwind CSS*

- Centralized **KPI tracking for 10+ organizational programs** — cut stakeholder reporting time by **~50%**.
- Built **8+ reusable chart & KPI card components** (bar, line, pie, trend) reused across 3 modules — zero duplication.

Aditya Birla — Channel Partner Portal *Oct 2023 – Mar 2024*

Stack: *React.js · Redux · REST APIs · Material UI*

- Built admin UI for **partner onboarding, user management & property lead tracking** — served **200+ channel partners** in a real estate ecosystem.
- Developed **performance dashboards & conversion metric reports** with RBAC — reduced manual reporting effort by ~40%.

Cogmentor — EdTech Assessment Platform *May 2023 – Oct 2023*

Stack: *React.js · Redux Toolkit · REST APIs · Tailwind CSS*

- Built **student onboarding flows & cognitive task modules** for evaluations — supported **500+ student assessments** with RBAC for Student and Parent roles.
- Delivered a **responsive, child-friendly UI** with 100% mobile compatibility; integrated APIs for assessment progression & result tracking.

Faceless Loans — Loan Management System *Nov 2022 – Apr 2023*

Stack: *React.js · Redux Toolkit · REST APIs · Material UI*

- Built **multi-step loan application form** with validation & progress tracking — reduced form abandonment by **~30%** through targeted UX improvements.
- Implemented **RBAC for Admin, Manager & Client**; integrated APIs for loan submission, status tracking & manager assignment with secure frontend data handling.

EDUCATION & CERTIFICATIONS

B.Tech — Mechanical Engineering, IMS Engineering College, Ghaziabad *2014 – 2018*

- **Backend Development with Node.js & Express.js** — NamasteDev.com
- **Full Stack Web Development** — Unschool
